

Dr. Gillian Winters will join the Laser Teaching Center in September of 2025 as a mentor for student projects and an undergraduate instructor in the Department of Physics. With a PhD in physics and a career that bridges academia and industry, she brings a wealth of experience in lab leadership and hands-on experimental work. She has run multiple research and development labs and is a recipient of several teaching awards, reflecting her passion for education and commitment to student success. Dr. Winters is especially excited to support and inspire the next generation of laser students through project-based mentorship and collaborative exploration.
