“ Every single person I’ve met here is really warm and welcoming. I feel **so safe on campus**. As an international student, I get homesick a lot but the supportive community here really helps me. I now call this my second home, which I’m really happy about.

REACH YOUR POTENTIAL

Mia

Jakarta, Indonesia

Psychology

Activities: International Student Alliance, Psychology Student Alliance, research assistant and summer peer assistant leader

60 MILES TO NYC VIA ON-CAMPUS TRAIN STATION 4 SEASONS

“I was here for the summer program, which helped me get acclimated to the area. We went to New York City and it was such a great experience. We visited the Museum of Modern Art. I love museums, so it was really a great treat for me. I made a lot of friends before school even started. And with so many clubs, international students have many ways to get involved in student life.”

Learn by Doing

Undergraduate students can gain real-world experience as early as their first year.

- Our Career Center helps students search for on-campus student employment or off-campus opportunities based on professional interest, not only academic majors.
- 95% of our recent bachelor’s recipients are either employed or enrolled in graduate/professional school and have life-long access to our career services.
- Students can learn through experiences such as research, internships, study abroad, service learning and community service.

New York City is a favorite destination.

“ There’s always someone you will find that **matches your vibe**, matches your culture. Stony Brook is a mix of all these people who are so kind-hearted and they don’t care where you’re from. It’s so easy to find the support that you need to give you that boost toward reaching your goals.”

Adita

Biology

Activities: International Student Advisory Council, Non-Native Communication in EMS Club; research assistant; Global Student Ambassador

“My first research experience was my second semester with Professor Pochron. She put us into groups and told us we would be working with worms but that we were to create our own experiments. And it just started something in us like, wow! We have the freedom to make our own experiment and try something different than everyone else. That really opened up my point of view and made me realize that I can pursue what I want to find out about through my own research.”

Intensive English Center

Students with excellent academic backgrounds can be conditionally admitted to Stony Brook University's Intensive English Center University Preparation (UP) Program. The UP Program offers students the opportunity to jumpstart their studies at Stony Brook by taking a combination of academic English courses and credit courses.

Top Teachers

Our award-winning faculty include Nobel Prize and Pulitzer Prize winners, MacArthur Fellows and Fields Medalists.

The MRI technology that won the Nobel Prize for Medicine was invented at Stony Brook. Here, you will learn from those who are generating the knowledge that is transforming the world.

Students can work on research projects with our faculty as early as their first year.

Jabe

Chemical & Molecular Engineering

Activities: Society of Hispanic Professional Engineers, Jubilé Latino

“The Corq app provides students with the opportunity to easily find events and meet people. If I want to take a break from reading, I know there is always an event I can check out. I’ve made a lot of friends that I can meet up with at activities we find on the app.”

When I was deciding on schools, Stony Brook being the flagship New York State school was definitely appealing, and I also wanted to go to a larger school. I know a lot of STEM universities might overlook the arts but I wanted a school where I could pursue a wide range of extracurricular activities, so seeing the Staller Center and the steps on the tour was very attractive. I also loved the vibe in the library and the North Reading room was a very vibrant area. I felt like I had found the place for me.”

“ **Everyone is super friendly** and considerate. I never feel alone here. There’s always someone who would be willing to go out dining with me, or do a late night study run to the library.”

One of Jabe’s favorite places on campus is the Wang Center, where he often studies or enjoys meeting up with friends at the popular Jasmine cafe.

Majors and Degrees

College of Arts and Sciences

Africana Studies, BA
Anthropology, BA
Art History & Criticism, BA
Art, Studio, BA
Asian & Asian American Studies, BA
Astronomy/Planetary Sciences, BS
Biochemistry, BS
Biology, BA, BS
Chemistry, BA, BS
Creative Writing & Literature, BFA[^]
Earth & Space Sciences, BA
Economics, BA
Engineering Chemistry, BS
English, BA
French Language & Literature, BA
Geology, BS
Globalization Studies & International Relations, BA
Health Science, BS
History, BA
Human Evolutionary Biology, BS
Italian Studies, BA
Linguistics, BA

Mathematics, BS
Media/Art/Culture, BA
Multidisciplinary Studies, BA
Music, BA[^] (audition required)
Philosophy, BA
Physics, BS
Political Science, BA
Psychology, BA, BS
Sociology, BA
